

Enhanced Booth Splitting

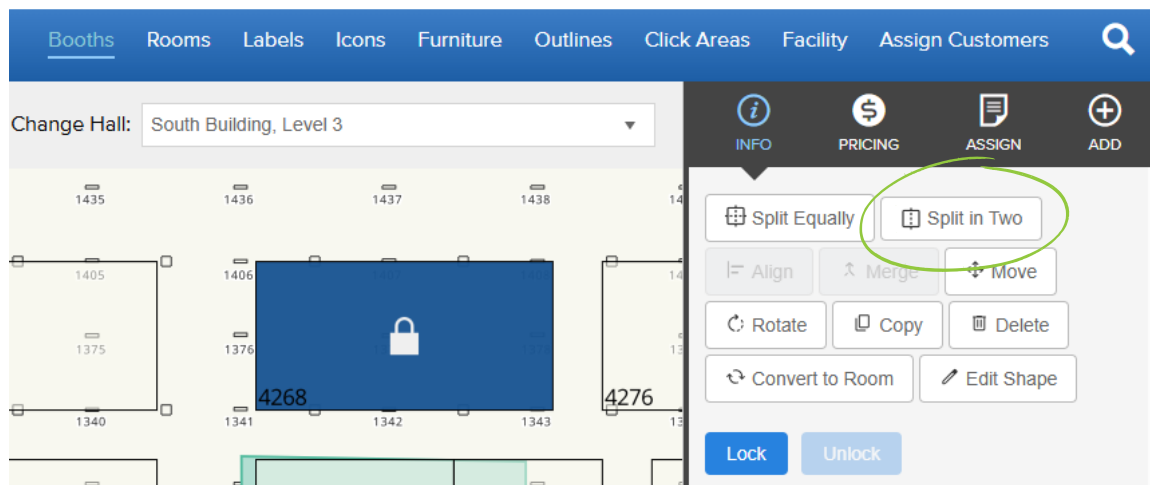

Splitting a Booth or Room Into Two Different Sizes

The enhanced booth splitting feature gives show management greater flexibility when configuring booth spaces. Rather than splitting a booth into two equal halves, you can now define the exact size of each resulting booth, splitting one space into two different sizes.

Split a Booth Into Two Different Sizes

Use this feature when a single booth needs to be divided into two booths of unequal dimensions. You can control the orientation of the split, define the size of each resulting booth, and designate which booth retains the original booth number.

- 1 Select the booth you wish to split from the floor plan. Once selected, click 'Split in Two' from the available options.

2

Review the booth details.

A panel will display the booth number and current size. Choose whether to split the booth vertically or horizontally based on your floor plan layout.

3

Designate the primary booth.

Select which of the two resulting booths is considered the primary booth — this booth will retain the original booth number.

***Note:** For events that use a max fit floor plan in MYS, booth numbering is determined by your max fit.

4

Set the width of the primary booth.

Enter the desired width for the primary booth. The system will automatically calculate and update the width of the secondary booth based on the total available space.

For example: If the total booth width is 60 and you set the primary booth width to 40, the secondary booth will automatically update to 20.

5

Click 'Split' to apply the changes.

The booth will be divided according to your selections, and both booths will be updated on the floor plan. Be sure to update the secondary booth number.

Booth: 4268

Total Size: 60' x 30'

Split Direction: Vertical

Select the booth that will retain the booth number

Primary Booth: Left

Primary Booth Width: 40 ft. 0 in.

The remaining width (20') will be assigned to the new right booth

PREVIEW

60' total

Left Booth Size: 40' x 30'

Right Booth Size: 20' x 30'
