

Setting Up Cross-Event Login

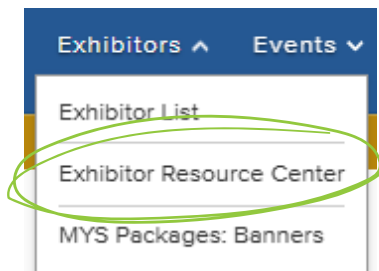

Cross-Event Login allows exhibitors to move between events in your show group without logging in again, eliminating the extra step of signing into each show separately.

How It Works

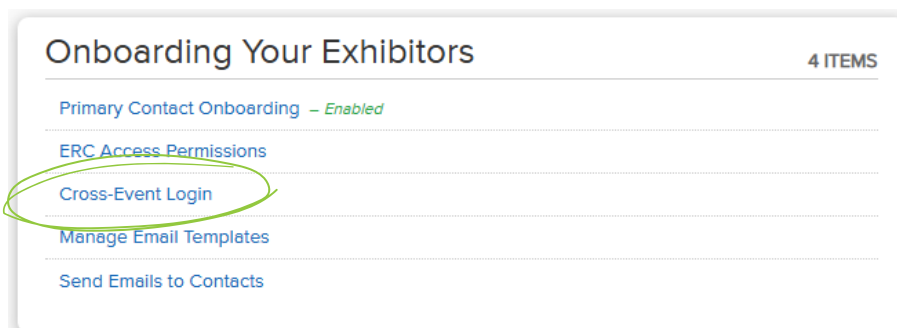

When enabled, exhibitors from a connected show can access your Exhibitor Resource Center (ERC) without a separate login, as long as they have an active profile in both events under the same email address.

Getting There

- 1 Log into your Show Dashboard and select the event you're working on.
- 2 From the main navigation, go to **Exhibitors > Exhibitor Resource Center**.

- 3 Under **Onboarding Your Exhibitors**, select **Cross-Event Login**.

Configuring Your Settings

You'll see a list of shows in your group, organized by current/upcoming and past events. Select the shows you'd like to grant access to your event, then save your changes.

Current & upcoming shows	ERC status	Bi-directional
<input checked="" type="checkbox"/> Big Datas 'R' Us <small>BIGDATA</small>	Active	—
<input checked="" type="checkbox"/> Exhibitor Details and Session Details Revamp Show <small>MYSESORDEV</small>	Active	↔ Enabled
<input type="checkbox"/> Exhibitor Details and Session Details Revamp Show One <small>MYSESOR1</small>	Active	—
<input checked="" type="checkbox"/> ExpoMYS 2026 <small>ExpoMYS</small>	Active	↔ Enabled
<input type="checkbox"/> ExpoMYS1 Sample Show <small>ExpoMYS1</small>	Active	—

Keep In Mind

- **Access is one-directional** — the shows you select can access your event, but not vice versa. Access is enabled per event. Have your team turn on Cross-Event Login in each show's settings, as admin permissions vary by event. When both sides have enabled access, the **Bi-Directional** column in your settings will reflect this.

Current & upcoming shows	ERC status	Bi-directional
<input checked="" type="checkbox"/> Big Datas 'R' Us <small>BIGDATA</small>	Active	—
<input checked="" type="checkbox"/> Exhibitor Details and Session Details Revamp Show <small>MYSESORDEV</small>	Active	↔ Enabled
<input type="checkbox"/> Exhibitor Details and Session Details Revamp Show One <small>MYSESOR1</small>	Active	—
<input checked="" type="checkbox"/> ExpoMYS 2026 <small>ExpoMYS</small>	Active	↔ Enabled
<input type="checkbox"/> ExpoMYS1 Sample Show <small>ExpoMYS1</small>	Active	—

- **Enabling this feature does not grant new access** — exhibitors must already have an active profile in both events under the same email address, and the ERC must be active for both events. Shows with an inactive ERC will not appear in an exhibitor's **My Other Events** list until it has been activated.
