Ask Insights

MYS Insights now includes Ask Insights, an AI-powered tool that helps you interpret your data, surface key takeaways, and answer questions about your show's performance directly within the Insights experience.

MYS Insights is organized into four main views, accessible from the top navigation bar: Pacing, Retention, Risk, and Upsell. Click on each option to access the view.

Pacing View

Pacing

Retention

Risk

Upsell

The Pacing view gives you a comprehensive snapshot of your show's financial and exhibitor performance relative to prior shows and internal targets.

The Pacing Tab has two views:

- **Volume & Financial** - Focuses on sales data.
- **Engagement** - Focuses on planner and directory data.

Volume & Financial

Engagement

Volume & Financial

Overall Pacing

Tracks current pacing across key metrics—exhibitors, square feet (or meters), booth sales, remaining inventory, MYS package sales, other sales, and total revenue—comparing progress week-over-week and against previous shows. The accompanying Pacing Assessment provides a plain-language summary of trends and notable changes.

Overall Pacing						
2025 as of Week -3						
Metric	Current Total	Last Week Pacing	Last Show	2 Shows Ago	3 Shows Ago	Prior Year Final
Exhibitors	1,531	+ 2.68%	+ 8.55%	+ 29.2%	+ 45.81%	1,410
Square Feet	1,198,223	+ 2.26%	+ 3.95%	+ 23.72%	+ 41.39%	1,095,000
Price per Sq Ft (Excl \$0)	\$95.44	+ 1.08%	+ 5.19%	+ 14.21%	+ 22.12%	\$93.69
Remaining Inventory	299,808	—	+ 15.34%	+ 31.92%	+ 39.79%	354,119
Booth Sales	\$41,086,462	+ 2.11%	+ 10.45%	+ 30.02%	+ 47.26%	\$37,200,000
MYS Packages	\$1,174,932	+ 3.31%	+ 11.89%	+ 33.5%	+ 52.58%	\$1,050,000
Other Sales	\$427,917	+ 2.29%	+ 8.33%	+ 29.67%	+ 47.56%	\$395,000
Revenue	\$42,229,351	+ 3.04%	+ 7.18%	+ 24.94%	+ 41.71%	\$39,400,000

Pacing Assessment

[See full analysis below](#)

[AI Takeaway](#)

MYS Next is pacing strongly with \$41.7M in total revenue, up 6.0% versus last show and 40.1% versus three shows ago, driven by healthy exhibitor growth of 7.4% and booth sales up 9.2% over the prior edition. Weekly momentum remains solid at +3.0% revenue growth, and remaining inventory has contracted 15.3% versus last show, signaling tighter supply. Price per square foot is essentially flat week-over-week at \$95.10, suggesting rate integrity is holding even as the floor fills.

Budget vs. Actuals

Compares your current totals against entered budget goals for exhibitor count, square feet (or meters), booth sales, MYS packages, items/other sales, and all revenue. Set goals directly from this section using the Set Budgets option.

Budget vs Actuals				
Actuals to date against entered budgets				
Budget Item	Actual to Date	Goal	% of Goal	Variance to Goal
Exhibitor Count	27	—	—	—
Square Feet	5,700	—	—	—
Booth Sales	\$2,144,000	\$1,000,000	214.40%	-\$1,144,000
MYS Packages	—	—	—	—
Items / Other	\$346,500	—	—	—
All Revenue	\$2,492,500	—	—	—

Exhibitor Pacing — Primary

Tracks the running total of primary exhibitors (including privates) signed by weeks out, compared against previous shows. Helps you gauge whether exhibitor acquisition is ahead of or behind historical benchmarks.

Exhibitor Pacing — Share

Similar to the view above, this includes only Share exhibitors (if applicable).

Square Feet Pacing

Displays the running total of square feet sold by weeks out, plotted show-over-show. Useful for identifying whether floor space commitments are tracking ahead of or behind prior cycles.

Remaining Inventory

Shows remaining square footage available for sale, plotted by weeks out. Helps your team anticipate when the show may approach sellout and plan inventory strategy accordingly.

Price per Sq Ft

Displays the average price per square foot as of max weeks out available, compared show-over-show. Includes both all sold booths and all sold booths excluding \$0 transactions.

Price Per Sq Ft Pacing (\$ / Sq Ft)

Tracks revenue per square foot by weeks out across shows, giving insight into pricing efficiency trends over time.

Financial Pacing — Booth / Space

Tracks booth and space revenue totals by week for all selected shows. If a budget is set, it will display a line for the budget for comparison.

Financial Pacing — All Revenue

Tracks all-revenue order totals (booth sales, MYS packages, and other items) on a running basis by weeks out, compared show-over-show. Helps you assess overall financial trajectory against prior show performance. **The same view is also available broken out for MYS Packages and Items/Other individually.**

Pacing Analysis

AI readout of overall pacing vs prior shows against market conditions including:

- Pacing Assessment — A snapshot of where current sales/bookings stand relative to prior periods (e.g., last year or last quarter), showing whether you're ahead, behind, or on track.
- Macro Backdrop — Context on broader economic or market conditions (ad spending trends, industry shifts, economic indicators) that are influencing the pacing picture.
- Forward-Looking Risks — Potential uncertainties on the horizon that could impact future pacing — things to watch or prepare for.
- Action Items — Specific recommended steps or decisions the team should take based on the pacing and risk analysis.

AI readout of overall pacing vs prior shows against market conditions

Pacing Assessment

MYS Next is pacing strongly with \$41.3M in total revenue, up 4.8% versus last show and 38.5% versus three shows ago, reflecting sustained multi-cycle growth. Weekly momentum remains healthy at +3.0% revenue gain, with exhibitor count at 1,496 (+6.1% vs. last show) and remaining inventory down 30.8%, signaling the floor is filling faster than prior editions. Price per square foot holds steady at \$36.10, and MYS Packages are the fastest-growing line at +3.3% week-over-week, suggesting exhibitors are upgrading their commitments.

Macro Backdrop

The U.S. economy presents a mixed but manageable environment: business confidence sits at 52.7 but is forecast to soften to 48 by Q4, while GDP growth is expected to decelerate from 2.7% annual to 1.6–1.8% in mid-year quarters. Interest rates are projected to hold flat at 3.75% through year-end, and unemployment is expected to edge up to 4.5%, which could temper corporate spending decisions as the show approaches.

Forward-Looking Risks

- Business confidence is forecast to decline from 52.7 to 48 by Q4, potentially slowing late-cycle exhibitor commitments and booth upgrades as corporate budgets tighten.
- Non-farm payrolls are projected to weaken significantly (70K–80K range), and rising unemployment to 4.5% may cause exhibitors in labor-sensitive sectors to downsize or defer participation.
- With only 269,507 sq ft of remaining inventory (down 30.8% vs. last show), limited availability could constrain revenue upside unless pricing strategy captures the scarcity premium effectively.

Action Items

- Accelerate outreach to uncommitted prospects now, leveraging the 30.8% inventory reduction as urgency messaging before business confidence deteriorates further in Q3–Q4.
- Evaluate a targeted price increase on premium remaining sq ft positions, given that current pricing is essentially flat week-over-week (-0.1%) despite strong demand and shrinking supply.
- Expand MYS Package promotion given its 3.3% weekly growth and 9.3% gain over last show, positioning bundled offerings as value protection against potential macro headwinds later in the sales cycle.

Engagement

Volume & Financial

Engagement

The Engagement tab tracks attendee and planner activity on your show's digital platform, giving you a show-over-show view of how attendees are interacting with exhibitors, sessions, and content leading up to your event.

Planners & Opt-In Counts

Displays the total count of active planners and opt-ins per show, with a trendline for lead conversion rate. Active planners are attendees with at least one favorited item. The opt-in count represents active planners who chose to share their contact information, making them leads for the exhibitors they favorited. The opt-in percentage reflects the share of active planners who opted in.

Planners & Opt-In Counts

Total Active Planners and Opt-In Count by Show

Active Planners Pacing

Tracks the weekly count of new active planners by weeks out, compared show-over-show. This view highlights when attendee planning activity accelerates relative to prior cycles, helping you identify whether engagement is building earlier or later than expected.

Active Planners Pacing

Weekly New Active Planners by Weeks Out

Planner Growth

Displays the cumulative running total of active planners by weeks out, plotted show-over-show. Use this chart to assess the overall growth trajectory of your planner base as the event approaches.

Planner Growth

Cumulative Planners by Weeks Out

Exhibitors Favorited

Tracks the running total of exhibitors favorited by attendees, by weeks out, compared show-over-show. Higher favoriting activity signals strong attendee intent and increases the likelihood of opt-in lead generation for exhibitors.

Exhibitors Favorited

Running Total by Weeks Out

Sessions Favorited

Tracks the running total of sessions favorited by attendees, by weeks out, compared show-over-show. Useful for gauging content engagement and identifying whether session programming is resonating with your audience ahead of the event

Leads

Tracks the running total of leads generated through the planner, by weeks out, compared show-over-show. A lead is created when an active planner opts in to share their information with an exhibitor they have favorited.

Mobile Downloads

Tracks the weekly count of mobile app downloads by weeks out, compared show-over-show. Spikes in download activity typically correspond to promotional pushes or the opening of the show, and can serve as a leading indicator of broader attendee engagement.

Visits

Tracks the running total of platform visits by weeks out, compared show-over-show. Use the filter tabs to segment visits by type: Exhibitor Profile, Session Detail, Floor Plan, Search, and Recommendations. This breakdown helps you understand which areas of the platform are driving the most traffic.

Views

Tracks the running total of content views by weeks out, compared show-over-show. Toggle between Showroom Views (exhibitor profile page views) and Session Views to understand where attendees are spending their time on the platform.

Retention

Risk

Upsell

Retention View

The Retention view provides a focused look at exhibitor renewal health. At the top of the page, five headline metrics give you an immediate read on the current booking cycle: eligible for renewal, renewed (with Veteran and first-time exhibitor breakdowns), not yet renewed, upgrade sq ft units, and downgrade sq ft units.

Retention Assessment

An AI-generated narrative summary analyzes the current retention picture, highlights notable risks, and surfaces actionable recommendations for your sales team. The assessment includes context on historic backdrop, forward-looking risks, and suggested action items.

Retention Assessment

AI takeaway [see full analysis below](#)

Net sq ft among renewers dropped 2.9% (766,500 → 744,600 sq ft) despite a 67% exhibitor renewal rate, meaning downgrades are eroding yield faster than upgrades can offset. The 396 non-renewed exhibitors represent 164,250 sq ft of recoverable revenue. Cohort mix is remarkably stable—Veterans hold at 49%, and the flywheel ratios are unchanged across four cycles, signaling a structurally healthy but margin-pressured show.

Exhibitor Composition by Cohort

All exhibitors classified into five loyalty cohorts:

- Veteran – An exhibitor that has participated in multiple consecutive show cycles and returned again this time.
- Converted – A previously lapsed exhibitor that your team actively brought back into the current show.
- Single-cycle Skipper – An exhibitor that missed only the immediately prior show but has returned for this one.
- Win-back – A lapsed exhibitor (missed one or more cycles) that has been successfully re-engaged and rebooked.
- True New / Net New – A company exhibiting at this show for the very first time with no history in any prior cycle.

Note Only years with a Veteran cohort are shown

Renewal Status

See where your renewals stand at any point in the booking cycle. You'll get a customer count for each status — eligible for renewal, renewed, not yet renewed, newly signed (true new and win-backs) — along with a running tally of how much space you still need to match your prior show.

For exhibitors who haven't renewed yet, risk indicators break that group into High, Medium, and Low tiers so your team knows where to focus first.

Floor Health

This section breaks down where your floor growth is actually coming from.

You'll see how booth activity — upgrades, downgrades, new signings, and first-timers — is adding up across the current cycle. The metrics break down net square footage by source, so you can tell at a glance whether you're growing through new acquisition, existing exhibitors upsizing, or a mix of both. A running total shows how far you are from matching last show's footprint.

Useful for sales leadership to track momentum and spot where to push harder.

Sq Ft Position by Cohort

This section breaks down how each exhibitor segment is contributing to your floor.

You'll see current square footage booked versus the prior show for each cohort — Veterans, First-Timers, Single-Cycle Skippers, Win-backs and True New — along with net change and average contribution per exhibitor. A ranking indicator shows how each group is tracking relative to expectations.

Useful for spotting which segments are driving growth and which ones might need a closer look.

Sq Ft position by cohort

Which groups are holding, shrinking, or building floor presence

COHORT	EXHIBITORS	PREV SQ FT	CURR SQ FT	NET SQ FT	AVG / EXHIBITOR	SIGNAL
Veterans	731	576,365 sq ft	599,420 sq ft	+23,055	+32 sq ft	Building
First-timers	213	101,085 sq ft	119,280 sq ft	+18,195	+85 sq ft	Building
Single-cycle	122	78,239 sq ft	71,980 sq ft	-6,259	-51 sq ft	Shrinking
Win-backs	137	81,185 sq ft	87,680 sq ft	+6,495	+47 sq ft	Building
True new	320	—	134,400 sq ft	+134,400	new	Building
Total	1,523	836,874 sq ft	1,012,760 sq ft	+175,886	—	—

Cohort-level sq ft splits are estimated — connect to five-cohort SQL classification for exact figures per cohort.

Retention by Industry

This section shows renewal rates across your exhibitor base, broken down by industry and ranked from highest to lowest.

Each bar represents the percentage of exhibitors in that category who have renewed for the current show. Industry categories are generated automatically based on each exhibitor's profile and product data, so the segmentation reflects your actual floor makeup rather than a predefined list.

Useful for spotting which verticals are holding strong and which ones may need some attention before they become a retention problem.

Key Signals

Surfaces the most important positive and negative trends emerging from the current booking cycle — quantifying the square footage impact of downgrades and flagging momentum areas where exhibitors are expanding or increasing engagement. Each signal includes a description to help your team act quickly.

Useful for catching momentum swings early and knowing where to focus.

Key Signals

What the retention data reveals that headline numbers alone do not

DOWNGRADES ARE ERODING FLOOR EVEN AMONG RENEWING ACCOUNTS -75,439

Downgrades signals

208 renewing accounts reduced their footprint — shedding 75,439 sq ft net. This happens before any non-renewal loss is counted. An exhibitor that renews smaller is signaling reduced commitment and is a non-renewal risk next cycle. These accounts need a direct conversation about what would drive them to hold or grow.

UPGRADES ARE THE MOST UNDERVALUED ACTIVITY IN THE SALES PROCESS +89,681

Upgrades signals

188 accounts expanded their footprint by a net 89,681 sq ft — with no acquisition cost. Every upgrade conversation with an existing account generates more floor than a cold reach-out to a new exhibitor, at a fraction of the effort. A systematic upgrade program compounds this across every cycle.

Sq Ft figures carry directly from renewal data. Cohort-level splits are estimated — connect to five-cohort SQL classification for exact per-cohort figures.

Retention Analysis

A detailed AI-powered narrative built from the same signals, organized into three sections: What's Working (renewal rates, upgrade activity, engagement patterns), What's Not (areas needing targeted intervention), and Do This (prioritized action items for your sales and CSM teams).

Retention Analysis

Tradeshows-analyst readout of cohort trajectory and forward-looking moves

Cached ...

Retention Assessment

Net sq ft among renewers dropped 2.9% (766,500 → 744,600 sq ft) despite a 67% exhibitor renewal rate, meaning downgrades are eroding yield faster than upgrades can offset. The 396 non-renewed exhibitors represent 164,250 sq ft of recoverable revenue. Cohort mix is remarkably stable—Veterans hold at 49%, and the flywheel ratios are unchanged across four cycles, signaling a structurally healthy but margin-pressured show.

What's Working

- Veteran count +15% YoY** (674 → 773), sustaining the loyal base in absolute terms while share ticked up a point to 49%.
- Upgraders averaged +48% more sq ft** (953 → 1,431 sq ft per exhibitor), showing real pricing power among the 188 accounts that expanded.
- True New volume held flat** (303 → 328), maintaining acquisition without diluting cohort quality.

What's Not

- Downgrades outpace upgrades in sq ft loss:** 208 downgrades shed 75,439 sq ft vs. 89,681 sq ft gained from upgrades—net positive only 14,242 sq ft, nearly wiped by non-renewals.
- 164,250 sq ft not yet recovered** across 396 lapsed accounts; 57% sit in Medium/High risk tiers (27,594 sq ft High, 66,357 sq ft Medium).
- Single-cycle skippers steady at 8%** for four consecutive cycles—this cohort isn't converting or shrinking, suggesting a structural re-engagement gap.

Do This

- Sales:** Prioritize the 67 High-risk accounts (27,594 sq ft) with a lapsed-exhibitor offer tied to a deadline within 6 weeks.
- CSM:** Flag the 208 downgrades for retention calls; identify which are budget-driven vs. dissatisfaction-driven to prevent next-cycle churn.
- Leadership:** Set a target to convert 25% of single-cycle skippers into Veterans by adding a loyalty incentive at the two-cycle mark.

Risk View

Pacing

Retention

Risk

Upsell

This table shows the most common reasons exhibitors are being flagged for renewal risk across your show. It equips your sales team with the intelligence needed to intervene early and reduce churn.

Risk Summary

Three headline tiles display the count of High Risk, Medium Risk, and Low Risk exhibitors, each with their percentage of the total exhibitor base. A color-coded progress bar for each risk level provides a quick visual on the overall exhibitor pool.

Top Risk Reasons

This table shows the most common reasons exhibitors are being flagged for renewal risk across your show. Click any reason to filter the At Risk Exhibitors list below to companies matching that signal.

At Risk Exhibitors

This section surfaces exhibitors who may be at risk of not renewing based on how they're engaging — or not engaging — with your platform and event.

Behavioral signals and event engagement metrics are used to flag accounts that warrant a closer look, giving your sales team the heads-up they need to reach out before churn becomes harder to reverse. Select any exhibitor to log notes or mark them as reviewed once they've been contacted.
